Drought Funding

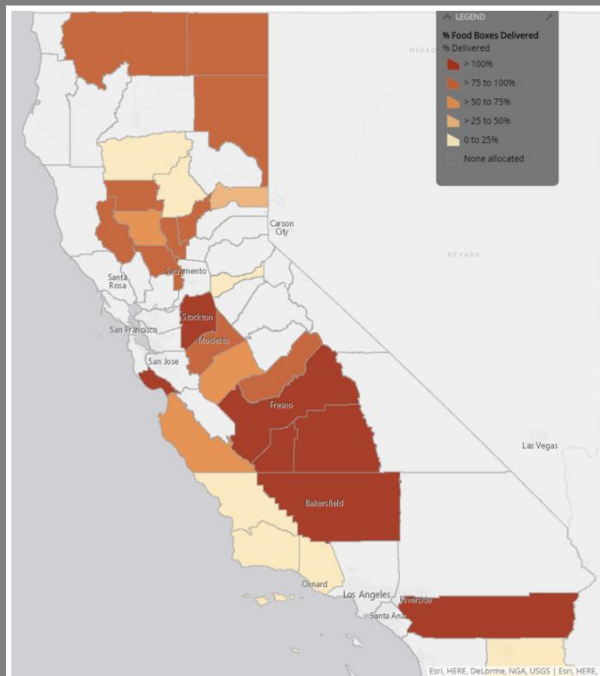

California Disaster Assistance Act Funding CDAF

Funding for Emergency water supplies to households without water for drinking and/or sanitation purposes.

Total: **\$3,932,736** Week Ending 10/2/2015

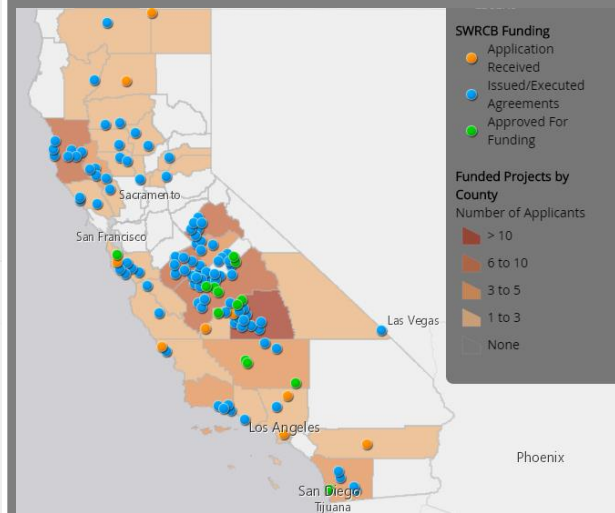

Emergency Food Assistance –FoodLink

The Department of Social Services (CDSS) Drought Food Assistance Program (DFAP) provided to date, over **1,013,968 boxes** to community food banks in drought-impacted counties,

- Approximately **915,013 boxes** of food have been picked up by **478,110 households**.

Drinking Water Drought Funding

Weekly updates from the State Water Resources Board

Executive Briefing Journal provides:

- Situational Awareness of Recovery Efforts, and
- Serves as a Common Operational Picture

NOTE:

- Map Color Thematic– Darker colors denote higher intensity or values

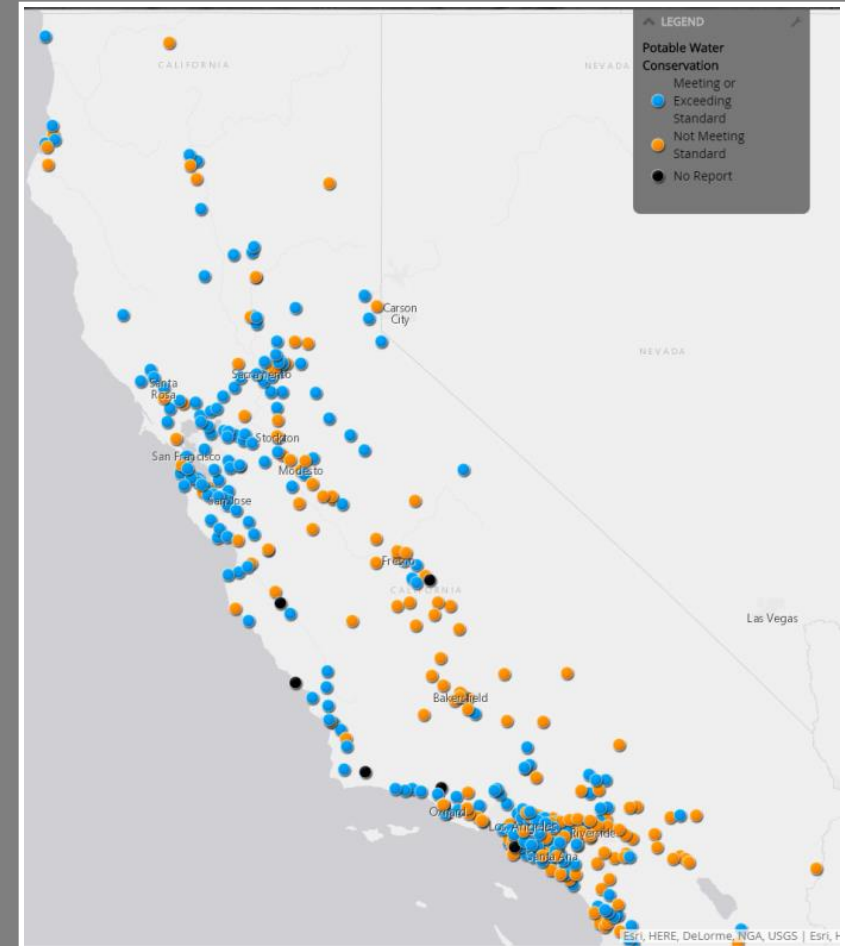

Mitigation

The emergency water conservation regulation requires urban water suppliers to provide monthly water use reports to the State Water Board. Urban water suppliers are expected to meet, or exceed, their individual conservation standard starting in June 2015 and continuing through February 2016. The year 2013 serves as the baseline for determining water savings statewide.

Data submitted by water suppliers is available on the State Water Resources Control Board's Water Conservation Portal. Suppliers report monthly production statistics and residential gallons per capita per day (R-GPCD). The data presented here reflect residential water conservation derived from these reports.

Monthly Report by the State Water
Resources Control Board

Residential Water Conservation Standard

Environmental Impact

Subsidence in the Central Valley, California

No issues detected Edit

Sacramento Valley, 12/04 - 5/10

Sacramento Valley, 5/20/2014-11/28/2014

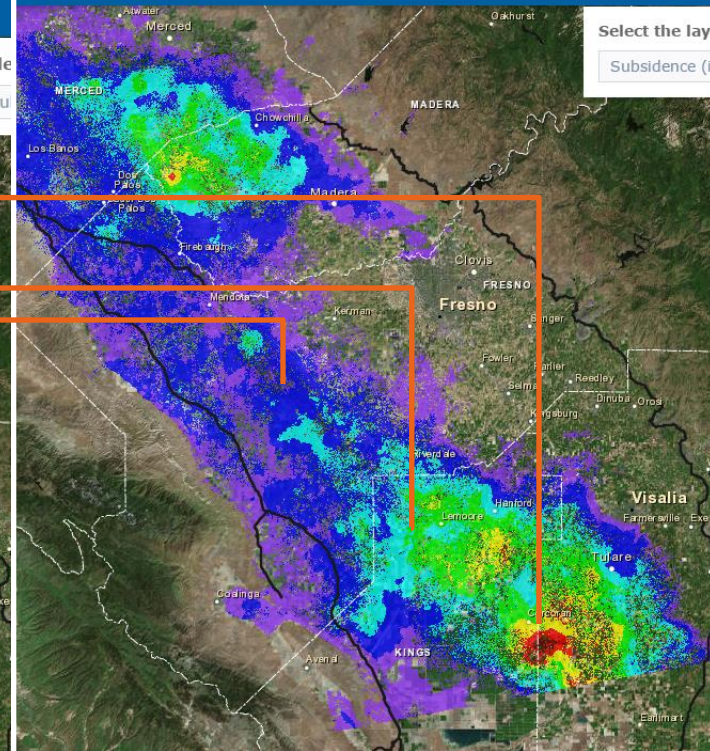

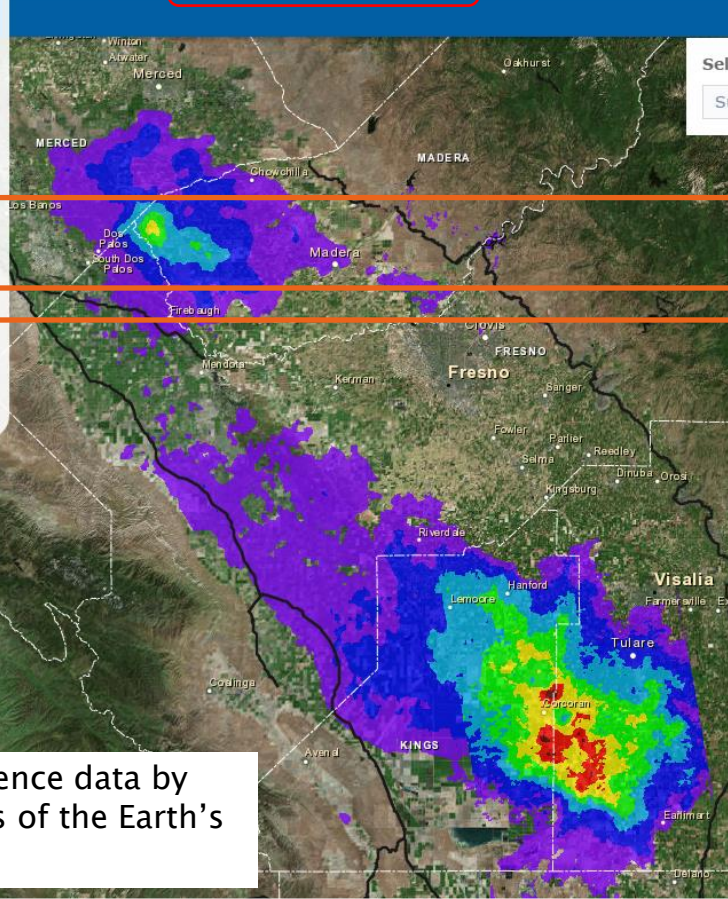

San Joaquin Valley, 6/07 - 12/10

San Joaquin Valley, 5/3/2014 - 1/22/2015

San Joaquin Valley, 5/3/2014 - 1/22/2015

Subsidence in the San Joaquin Valley for the period June 2007 - December 2010 as measured by the Japanese PALSAR and processed at JPL.

Inches

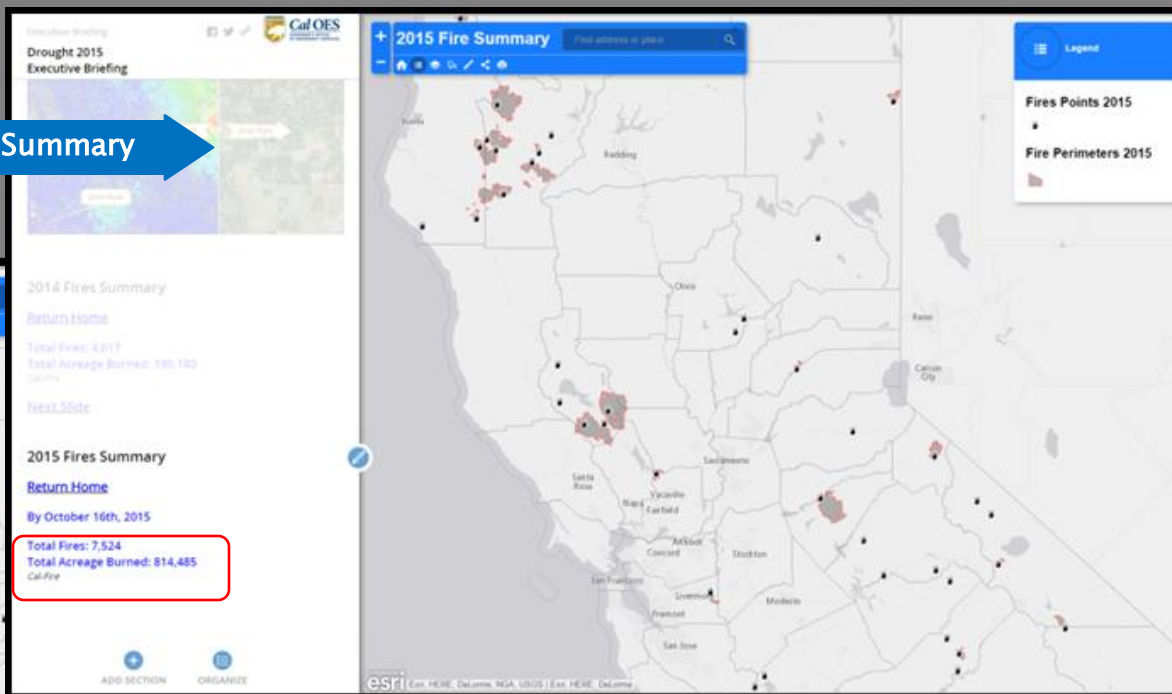

NASA obtained the subsidence data by comparing satellite images of the Earth's surface over time

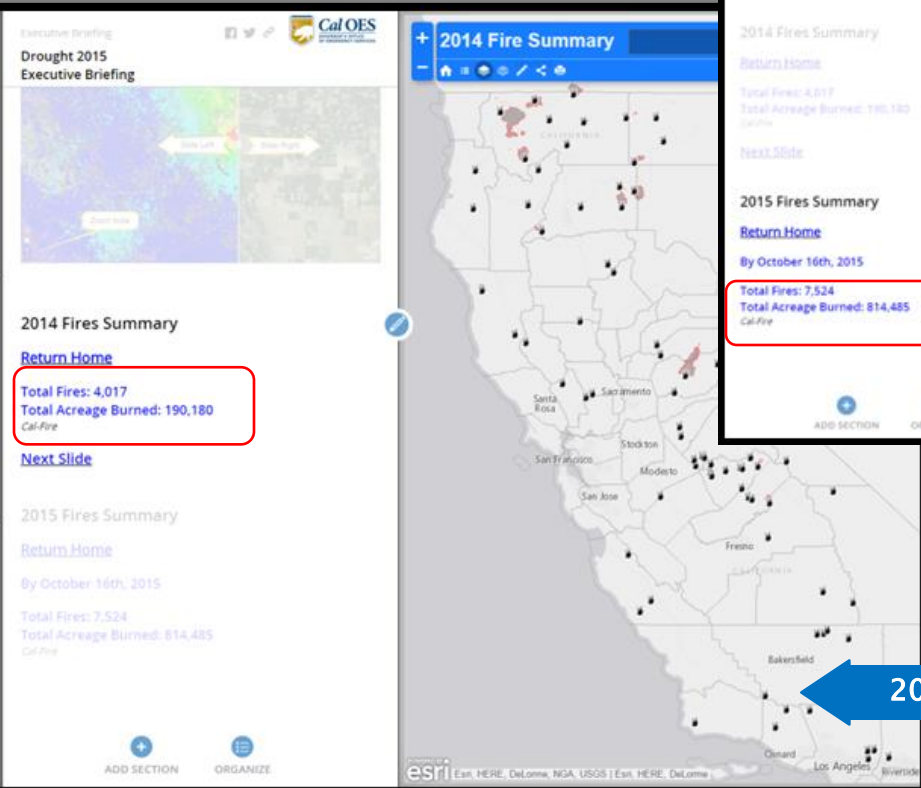

Comparisons of Subsidence from 6/2007 -12/2010 to 5/2014 -1/2015

Flood Map Journal 2015

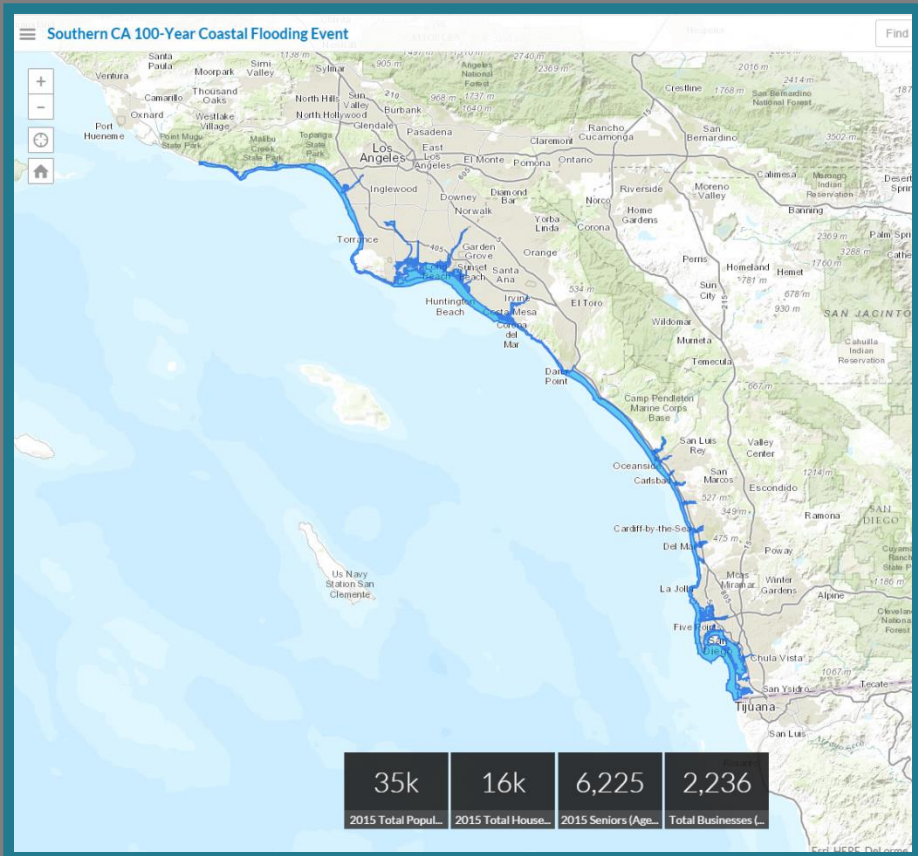

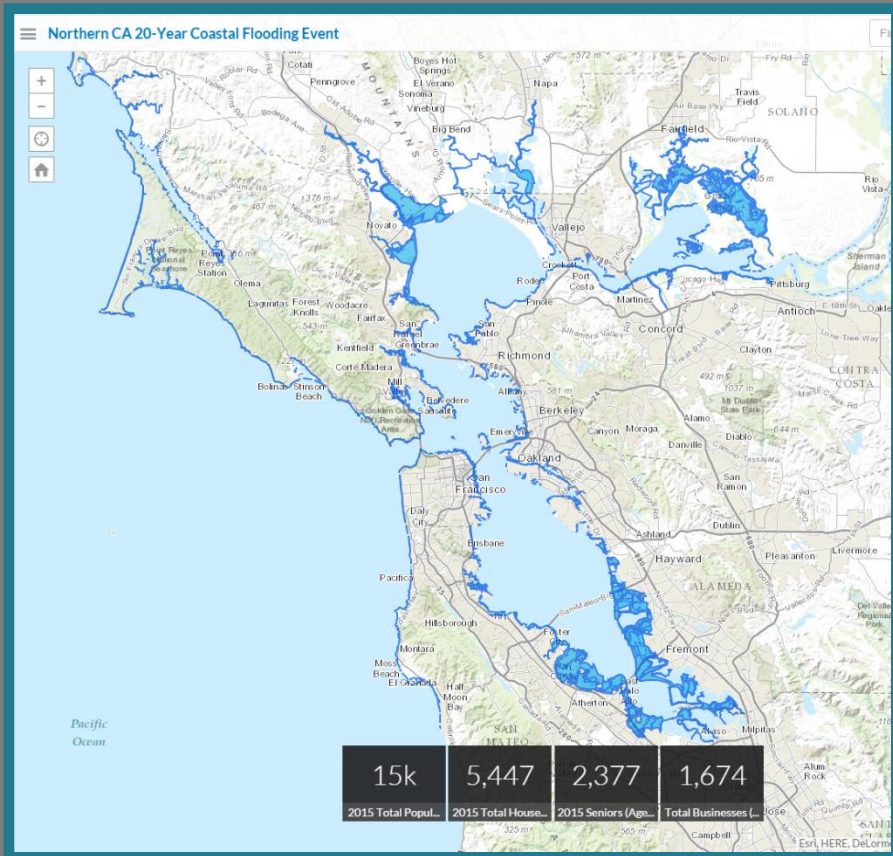

Probability of Coastal Flooding Events and Population Demographics

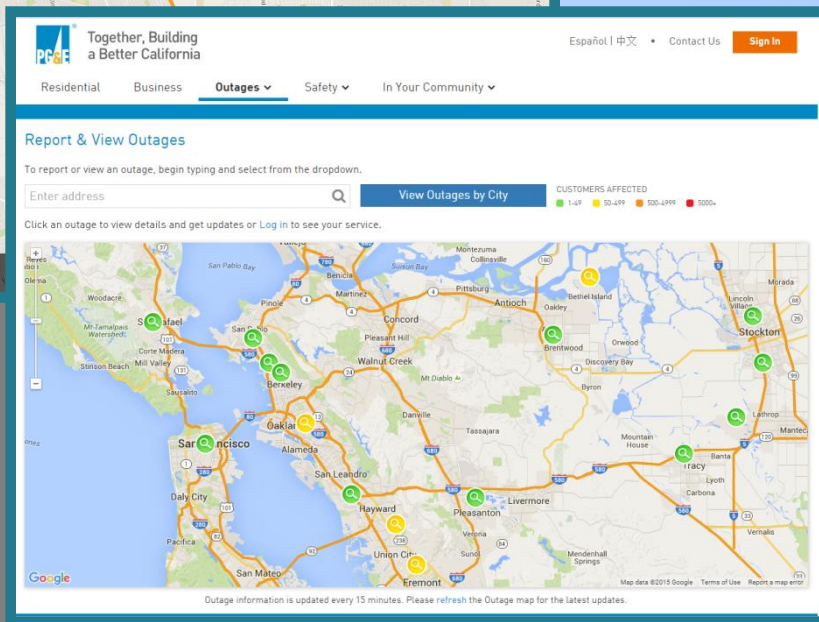

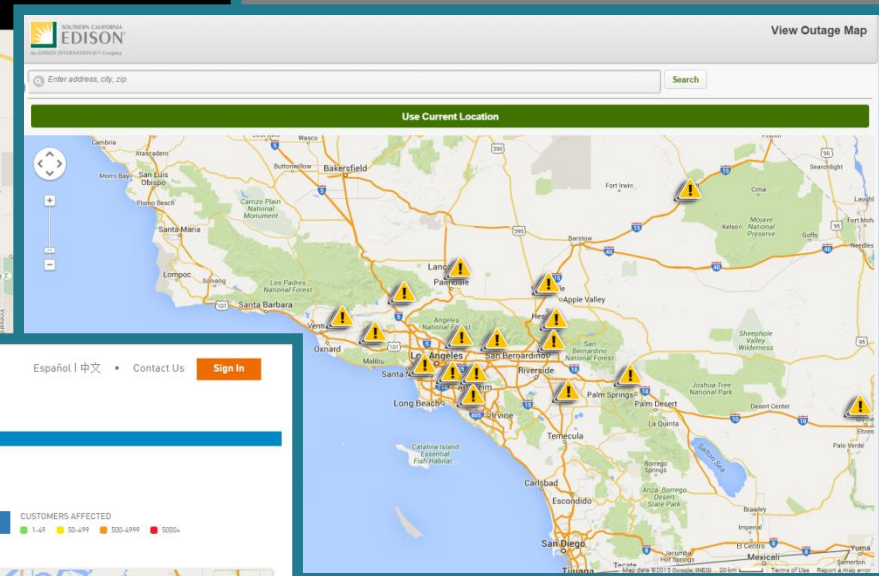

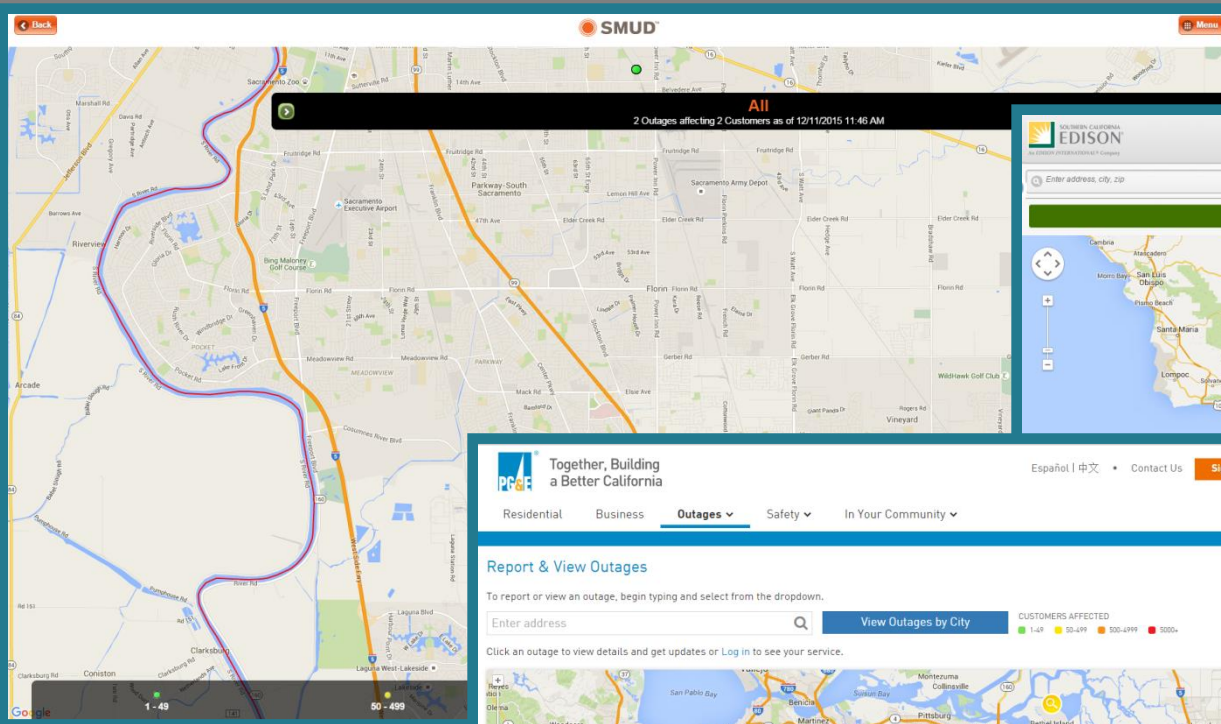

ESRI Demographic Methodology 2010/2015

Present day sea level plus an extreme coastal flooding event associated with a large storm that occurs on average for:

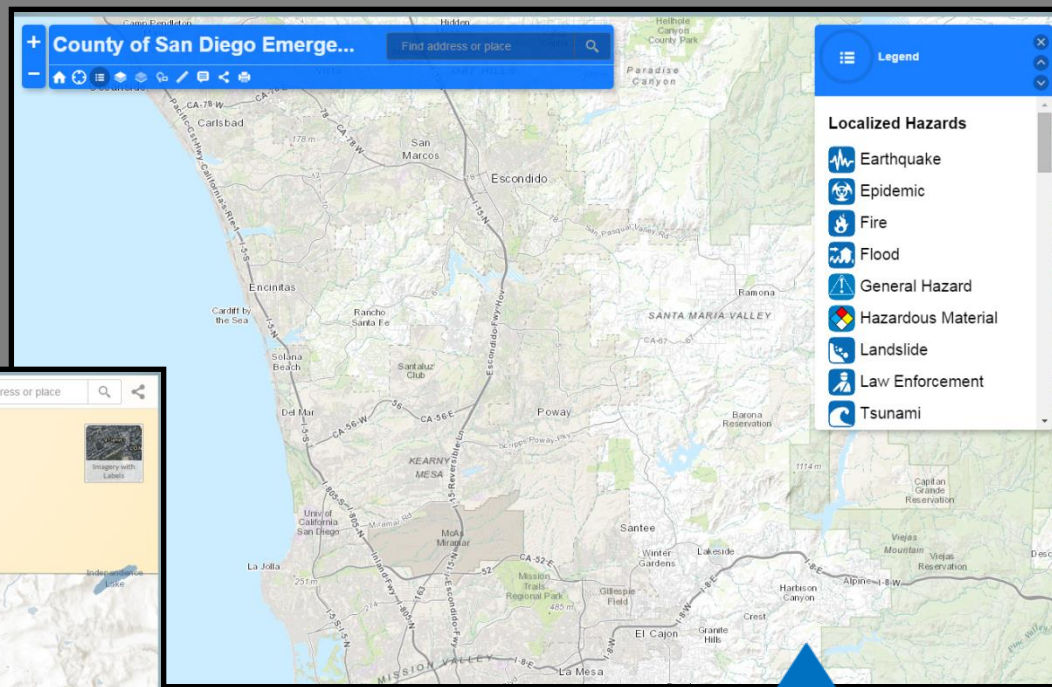

- North Central California Coast once every 20 years (5% probability each year), and
- Southern California Coast once every 100 years (1% probability each year)

Accomplishments

Congratulations to Geographic Information Systems (GIS) Analyst, Hans Frederiksen, whose map submission “Statewide Haz–Mat Teams Response Time,” has been selected for publication in the Environmental Systems Research Institute (Esri) Map Book, Volume 31, which will be distributed at the next Esri User Conference scheduled for June 27–July 1, 2016.

Special Achievement in GIS Award 2015

By embracing geographic information system (GIS) technology, the organizations who received this award have used GIS to improve our world—and set new precedents throughout the GIS community.

Approximately 150 organizations were selected from approximately 300,000 to receive a Special Achievement in GIS Award in a special ceremony at the 30th Annual Environmental Systems Research Institute (ESRI) International User Conference. The winning organizations received this honor for their vision, leadership, hard work, and innovative use of ESRI's GIS technology.

Lessons Learned

ArcGIS Online (AGOL) Best Practices and Governance:

- Create and Maintain Cal OES AGOL Groups, Users, Roles, and Access
- Establish SOP for Joining Cal OES AGOL Groups
- Define AGOL Share Data Formats
- Establish AGOL Workflows for Incident Data and Sharing
- Shared Data Management – Download and Archives

Incident Data Acquisition and Display on Map Journals:

- Active Engagement with Participating Partners for Current and Real-time Incident Data for a Common Operational Picture
- Display Current and Status Change Data for Quick and Accurate Situational Awareness
